ANKITA SERIWALA

Data Analyst | Data Scientist | Software Developer

+91 8224808438 | ankitaseriwala48@gmail.com | linkedin.com/in/ankitaseriwala48

PROFESSIONAL SUMMARY

Dynamic and detail-oriented Data Analyst & Software Developer with 1.8 years of hands-on IT training experience at Baroda Institute of Technology, Ahmedabad. Proficient in Python, Machine Learning, Deep Learning, and Software Development principles. Adept at transforming complex datasets into actionable insights and building predictive models using Regression, Classification, Neural Networks, CNN, and RNN. Skilled communicator with a proven track record of simplifying advanced technical concepts for 100+ students.

TECHNICAL SKILLS

Languages	Python, C, C++
Libraries/Frameworks	Pandas, NumPy, Seaborn, Matplotlib, Scikit-learn, TensorFlow, FastAPI
Machine Learning	Regression, Classification, Neural Networks, CNN, RNN, Deep Learning, KNN, Random Forest, SVM, PCA, Decision Tree, Ensemble Learning, Feature Engineering, Data Preprocessing, Supervised & Unsupervised Learning, Statistics, Web Scraping
Databases	MySQL, SQL Server
Web Technologies	HTML, CSS, JavaScript (Basic)
Tools & Platforms	VS Code, Jupyter Notebook, Google Colab, Git, GitHub, Kaggle, Power BI

WORK EXPERIENCE

IT Trainer **Aug 2024 – Mar 2026**

Baroda Institute of Technology, Ahmedabad

- Trained 100+ students in Python (basic to advanced) covering OOP, Data Structures, file handling, and data science libraries over 1.8 years.
- Taught SQL & MySQL for database design, normalization, and complex querying with real-world business datasets.
- Delivered sessions on Data Analysis using NumPy and Pandas — data cleaning, wrangling, aggregation, and EDA.
- Conducted Machine Learning workshops: Regression, Classification, KNN, Decision Trees, Random Forest, SVM, Neural Networks, CNN, RNN, and Deep Learning.
- Guided students on data visualization using Matplotlib, Seaborn, and Power BI — charts, heatmaps, and dashboards.
- Mentored students on VS Code, Jupyter Notebook, Google Colab, Git & GitHub for version control and collaboration.

PROJECTS

Customer Churn Prediction **Python | Scikit-learn | TensorFlow | Pandas | Seaborn**

- Built a full ML pipeline applying Logistic Regression, Random Forest, SVM, KNN, Decision Tree, and Ensemble Learning to predict telecom customer churn — compared all models using Accuracy, Precision, Recall, and F1-Score.
- Applied feature engineering, PCA, and data preprocessing (normalization, encoding); achieved 88% accuracy. Extended with a TensorFlow/Keras Deep Neural Network (Dense layers, Dropout) for improved performance.

House Price Prediction **Python | NumPy | Pandas | Scikit-learn | Matplotlib**

- Developed Linear Regression and Ensemble Learning (Gradient Boosting, Random Forest) models; applied feature engineering, correlation analysis, and preprocessing for optimal performance.
- Evaluated using RMSE and R^2 score; visualized predicted vs. actual prices and residual plots with Matplotlib.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science **2019 – 2023**

Swami Vivekanand College, Indore | Aggregate: 75%

CERTIFICATIONS

- IBM Data Analysis Professional Certificate – Coursera
