Full-Stack Developer with around 1 year of experience in MERN stack development and strong proficiency in JavaScript. Skilled in building scalable REST APIs, secure backend systems, and production-level web applications. Experienced in system design, database management, and backend architecture with a solid foundation in data structures and algorithms. Solved 650+ DSA problems across multiple platforms, demonstrating strong problem-solving and analytical skills.

SKILLS

- **Programming Languages:** Java, JavaScript, C/C++, Python, Dart
- **Frontend Technologies:** HTML5, CSS3, React.js, Redux Toolkit, Tailwind CSS
- **Backend Technologies:** Node.js/Express.js, REST APIs, , Prisma ORM
- **Database Management:** MongoDB, MySQL, PostgreSQL
- **Mobile Development:** Flutter, BLoC,GetX, REST API Integration
- **CI/CD & Tools:** Git/GitHub, VS Code, Postman, Hoppscotch, Android Studio

PROFESSIONAL EXPERIENCE

Junior Full Stack Developer – Unicorn Technologies Pvt. Ltd. Indore	Sep 2025 – Mar 2026
• Designed and developed a secure investment management platform (PIX Y) with role-based access for Client, Admin, and Super Admin, supporting portfolio tracking and financial operations. • Built scalable RESTful APIs using Node.js and Express.js to handle investment workflows, return calculations, user management, and secure data transactions. • Developed core investment logic for calculating monthly interest, profit estimation, and maturity amount based on defined investment plans. • Designed admin and super admin dashboards to manage users, investments, and system-level configurations with full control over platform operations Built and integrated features for admin dashboards and client-facing applications, ensuring seamless user experience and functionality.	
Junior Full Stack Developer – Delywizz Software Solution, Indore	June 2025 – Sep 2025
• Developing responsive and scalable web applications using React.js, Node.js, Express.js, and MongoDB while following production-level coding standards and clean architecture practices. • Developed secure REST APIs with JWT authentication, database validation, and efficient frontend-backend integration for handling large-scale application workflows. • Managed production deployment and monitoring using Vercel and Render, including debugging, error logging, and performance optimization.	

PROJECTS

BrightPath – Online Learning Platform GitHub Live (React.js, Tailwind CSS, JavaScript, Node.js, Express.js, MongoDB, JWT, Postman)
• Developed a full-stack Learning Management System (LMS) similar to Udemy, enabling course creation, enrollment, and content delivery. • Built a dynamic and responsive frontend using React.js and Tailwind CSS, improving UI performance and reducing load time. • Designed and implemented scalable RESTful APIs using Node.js and Express.js, enhancing data handling efficiency and system performance. • Developed core features such as course management, video/content delivery, user dashboard, and progress tracking. • Tested and validated APIs using Postman, ensuring reliability and smooth client-server communication.
Medicare – Your Health Over Priority GitHub Live (React.js, JavaScript, Node.js, Express.js, Postgres, Prisma)
• Built a multi-tenant healthcare SaaS with RBAC for 5 roles (Super Admin, Clinic Admin, Doctor, Receptionist, Patient) using React 18, Node.js, PostgreSQL, and Prisma ORM. • Designed a concurrency-safe scheduling engine preventing double booking via a DB-level unique constraint on (doctor ID, start Time) with serializable Prisma transactions. • Integrated Razorpay for consultation payments and SaaS subscription billing with webhook verification, automated PDF invoicing via SendGrid, and refund handling. • Implemented an EMR module with e-prescriptions, vitals tracking, AWS S3 document uploads, and real-time notifications via Socket.IO with strict role-scoped data access.
DevTinder – Developer Collaboration Platform GitHub Live (React.js, Tailwind CSS, JavaScript, Node.js, Express.js, MongoDB, JWT, Postman)
• Built a full-stack developer-networking platform to help developers connect, collaborate, and interact in real time using modern web technologies. • Designed and developed a scalable backend system with RESTful APIs for user authentication, profile management, connection requests, and interaction workflows. • Integrated frontend and backend efficiently to ensure smooth data flow, optimized API communication, and seamless user experience.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering Mandsaur University, Mandsaur	2021 – 2025 CGPA: 8.0
