Profile Summary:

Backend Developer with hands-on experience building full-stack web applications using Django, DRF, PostgreSQL, React.js, and REST APIs. Skilled in backend development, database design, authentication systems, and deployment workflows. Developed multiple production-ready and client-focused applications with a strong focus on performance, scalability, and clean architecture.

Technical Skills:

Languages: Python, JavaScript (ES6+), SQL, HTML5,
Backend: Django, Django REST Framework (DRF), Flask, REST APIs, JWT Authentication, Session Authentication
Frontend: React.js, JavaScript DOM, Tailwind CSS
Databases: PostgreSQL, MySQL, Firebase Firestore, Firebase Storage, Django ORM
Tools: Git, GitHub, GitHub Actions, Linux (Ubuntu), Postman, Render, Git Workflow, MVT Architecture
Core Concepts: OOP, DSA, REST APIs, Authentication & Authorization, Database Design, CRUD Operations

Projects:

Task Flow Pro – Advance Task Management System: May 2026 to Present, *Live↗* | *GitHub↗*

- Developed a task management platform supporting task creation, tracking, filtering, and analytics with role-based access control.
- Reduced task retrieval time by optimizing PostgreSQL queries and Django ORM operations.
- Implemented secure authentication and authorization for multi-user task management.
- Deployed the application on Render and optimized database queries and application performance to deliver

Ritesh Trader Business Portfolio (Client Project) | **Django**, **ReactJS**, **DRF**, **ORM**, **Tailwind CSS**, Aug 2025 – Sep 2025

- Developed a responsive business portfolio website for a local trader to showcase products, services, business information, and contact details.
- Built dynamic pages and backend functionality using Django and Django ORM for efficient content and data management.
- Implemented customer inquiry forms, WhatsApp integration, and Google Maps embedding to improve customer engagement.
- Designed a mobile-friendly user interface with Tailwind CSS, ensuring a seamless experience across devices.

Smart Scanner – Django Web Application: Apr 2026 to present *Live↗* | *GitHub*

- Developed a document scanning and management application using Django, enabling users to upload, organize, and manage digital documents efficiently.
- Implemented secure file upload, image processing, and document storage functionality to streamline document handling workflows.
- Utilized Django ORM for database operations and optimized application performance for reliable document processing and retrieval

Personal Portfolio Website: Dec 2025 to Present *live↗* | *GitHub*

- Developed and deployed a responsive personal portfolio website using React.js to showcase projects, technical skills, and professional achievements.
- Optimized application performance, routing, and responsiveness to improve accessibility and user engagement
- Integrated project showcases, contact information, and professional profiles to create a centralized online presence.

Education:

BCA | MB PG college, University of Kota – Computer Science agu-2022-sep-2025

- CGPA: 7.0

HSC RBSE | Government Senior secondary School, Old Block, Jhalawar PCM July 2021-march 2022

- Division: 65%
