PROFILE SUMMARY

Full Stack Developer with internship experience in the MERN stack. Skilled in JavaScript, TypeScript, React.js, Node.js, Express, and MongoDB, along with experience in Java and Spring Boot for backend development. Focused on building scalable APIs, responsive UIs, and clean architecture. Strong foundation in Data Structures and Algorithms, with experience in API testing (Postman), debugging, and manual testing, ensuring application quality and performance.

SKILLS

Core Development: JavaScript, Java & Spring Boot, TypeScript, React.js, Next.js, Redux, Node.js, RESTful APIs, JWT

Database and Tools: PostgreSQL, MongoDB, MySQL, Supabase, Github

Methodologies: Agile, Responsive Design, Asynchronous Programming, Code Optimization, Performance Tuning

AI & LLM Technologies: Prompt Engineering, Large Language Models (LLMs), OpenAI APIs, AI-driven product prototyping

Certifications: McKinsey & Company – McKinsey.org Forward Program, Oracle - Database for developers Foundation

EXPERIENCES

A2BN Pvt.Ltd.

Indore, India

Software Engineer

October 2025 - Present

- Developed **production-level backend services using Java and Spring Boot**, including creating **controllers, services**, and REST APIs, integrating **AWS S3** for file storage, and building the corresponding frontend. Built **responsive, mobile-first UIs** and integrated dynamic features with a focus on performance and usability.
- Developed a full-stack web application using the **MERN stack (MongoDB, Express, React.js, Node.js)**. Worked extensively on Testing and Debugging, including API Testing with Postman.
- Built **responsive, mobile-first UIs** and integrated dynamic features with a focus on performance and usability.
- Applied **prompt engineering** to build AI-assisted features and improve development workflows.
- Worked extensively on **Testing and Debugging**, including API Testing with Postman.
- Managed **database design and integration** using MongoDB, ensuring efficient data handling.
- Handled **deployment, DNS configuration/pointing, and environment setup** for live production websites.

Projects

LiveDocs

- Developed **LiveDocs**, a full-stack real-time document collaboration application using **Next.js, TypeScript and Supabase**. Implemented secure authentication, scalable APIs, and responsive UI to enable seamless document creation and editing for multiple users. Focused on **testing, debugging, and deployment** to ensure performance, reliability, and clean architecture.

StudyNotion

- Developed **StudyNotion**, a full-stack e-learning platform using the **MERN stack (MongoDB, Express, React.js, Node.js)** with secure authentication and role-based access for users and admins. Built responsive interfaces and scalable APIs for course management, user interaction, and content delivery. Focused on **API testing, debugging, database integration, and deployment** to ensure a reliable and smooth user experience.

EDUCATION

Institute of Engineering and Science (IPS Academy), Indore

Indore, India

B.Tech(CSE) – 7.0 CGPA

2021-2025

Relevant Coursework: Object Oriented Programming (OOP), Database Management System (DBMS), Operating Systems, Networking, Data Structures and Algorithms (DSA), System Design
