EDUCATION

Technocrats Institute of Technology, Bhopal
B.Tech in Computer Science with AIML **CGPA: 7.9/10**

Sep 2022 – Jul 2026 (Expected)

Excellence Higher Secondary School, Begumganj
Class XII **Percentage: 88.4%**

2021 – 2022

PROJECTS

ScanDine: Smart QR-Based Digital Menu Platform

2025

- Built a QR-based digital menu platform enabling restaurants to provide mobile-friendly menu experiences with real-time menu management.
- Developed a secure backend using **Node.js**, **Express.js**, **MongoDB**, **Redis caching**, improving scalability and response performance.
- Implemented authentication with OTP verification, secure login flows, and automated email notifications using **Nodemailer**.
- Integrated **Multer** and **ImageKit** for custom image uploads and cloud-based media management for cafes and menu items.
- Designed a **dynamic QR-based menu** access system where each cafe receives a unique QR code linked to its live digital menu, enabling instant menu updates without reprinting physical menus.

AI Battle Arena: Multi-Agent AI Platform

2026

- Developed a multi-agent AI competition platform using **LangGraph**, **LangChain**, enabling multiple LLMs to generate responses in parallel.
- Integrated **Gemini**, **Cohere**, and **Mistral** models into a workflow-based system for comparative AI evaluation.
- Implemented an AI-as-a-judge architecture where Gemini evaluates model outputs and selects winners using structured **Zod-based response schemas**.
- Designed stateful graph workflows supporting concurrent execution, response aggregation, and structured evaluation pipelines.
- Built a modern frontend using **React.js** and **Tailwind CSS** to visualize battles, model outputs, scores, and evaluation reasoning.

Snitch: Luxury Fashion Clothing Platform

2026

- Build a modern luxury fashion Clothing platform delivering premium shopping experiences with elegant product discovery and seamless checkout flows using **React.js**, **TailwindCSS**.
- Developed a backend using **Node.js**, **Express.js**, and **MongoDB** supporting product variants, cart management, and secure checkout workflows.
- Designed a variant-based product architecture supporting dynamic sizes, colors, pricing, stock management, and image galleries for each product variation.
- Implemented advanced cart functionality with quantity management, real-time pricing updates, and optimized cart calculations and aggregation workflows using **MongoDB aggregation pipelines**.
- Integrated **Razorpay Payment Gateway** with secure order creation, payment verification, and transaction persistence for complete checkout processing.

SKILLS

- Languages:** JavaScript
- Frontend:** React.js, Tailwind CSS, GSAP, HTML5, CSS3
- Backend:** Node.js, Express.js, REST APIs, WebSockets
- Database:** MongoDB
- Tools:** LangChain, LangGraph, Tavily, Postman
- Version Control:** Git, GitHub

ACHIEVEMENTS

- Solved **100+** DSA problems on LeetCode and TUF.
- Participated in **InnoVenture 2024 Hackathon**, showcasing innovative problem-solving and collaboration on real-world challenges.

CERTIFICATIONS

- Full Stack Web Development – Sheryians Coding School
- React Developer Certificate – Sheryians Coding School
