PROFILE SUMMARY

I graduated with a B. Tech in Computer Science and Engineering and have spent the last two years diving deep into MERN stack development. I've had the chance to work on several real-world projects, utilizing tools like React.js, Next.js, Tailwind CSS, and Node.js to create clean, scalable, and user-friendly web applications. Right now, I'm part of The Green Bridge team, where I'm helping to develop GIS-based solutions that bring mapping and spatial data visualization to life.

SKILLS

Languages and Frameworks: JavaScript, TypeScript, Node.js, Express.js, React.js, Next.js, Bootstrap, Tailwind CSS, C/C++, Java (Basic), Python.

Tools & Technologies: Git, GitHub, Postman, Authentication (JWT/OAuth), Socket.IO, Cloudinary.

Geospatial Data Visualization (OpenLayers), GeoJSON/KML, OSM Nominatim & Overpass APIs, Map Projections (EPSG:4326 ↔ 3857).

Databases: MongoDB, PostgreSQL, Firebase.

Design Tools: Figma, Canva.

EXPERIENCE

FULL STACK DEVELOPER – THE GREEN BRIDGE | *Part Time*

Oct 2025 - Present

- Contributing to the development of a geospatial mapping and analytics platform for visualizing and comparing location-based data.
- Collaborated on a grid-based spatial querying workflow to improve search performance and grouped result visualization across large regions.
- Integrated geocoding and boundary retrieval workflows using open geospatial data sources.
- Tech Stack:** Next.js, TypeScript, OpenLayers, Tailwind CSS, Shadcn UI, Express.js, Axios, OSM APIs, GeoJSON

FREELANCE FULL-STACK DEVELOPER – EPTIRO ECOSYSTEM | *Remote*

Nov 2025 - Present

- Designed and developed custom web solutions for clients in the travel and business domains.
- Delivered projects with admin dashboards, real-time pricing, and secure payment integration.
- Maintained direct client communication, scoped requirements, and managed end-to-end delivery.

PROJECTS

Eptiro Ecosystem – Corporate Website & Learning Management System | [Live Dashboard](#)

Next.js, React.js, Node.js, PostgreSQL, Tailwind CSS

- Developed a corporate portfolio website integrated with a full-featured Learning Management System (LMS).
- Implemented role-based authentication, course enrollment, content management, and learner progress tracking.
- Built responsive dashboards for administrators, instructors, and students with streamlined management workflows.
- Designed scalable APIs and database structures to support efficient course delivery and platform operations.

Mini Social Network - Full-Stack MERN Application | [GitHub Repository](#)

- Technologies Used:** React (Vite), Node.js, Express.js, MongoDB, Socket.IO, JWT Authentication, Cloudinary, Tailwind CSS, Zustand.
- Architected and implemented a secure RESTful API with JWT-based authentication for user registration, login, and protected routes.
- Engineered a real-time, one-on-one chat system using Socket.IO, featuring live messaging, typing indicators, and message "seen" status to create a dynamic user experience.
- Integrated Cloudinary for cloud-based media storage, building a robust file upload system for user avatars and temporary, 24-hour "Stories" that automatically expire using a MongoDB TTL index.

Saffron International Tour & Travel Website | React.js, Next.js, Tailwind CSS, PostgreSQL | [Live Dashboard](#)

- Developed a responsive tour and travel booking platform with package browsing, booking management, and secure payment integration.
- Built an admin dashboard for managing tours, pricing, bookings, and website content with real-time updates.

Price-Wise - AI-Powered Price Comparison Platform | Next.js, Node.js, Firebase, Playwright, Cheerio, Firebase

AndinoHack 2025 Hackathon Project | [Live Dashboard](#)

- Developed a full-stack platform for comparing prices across major Indian retailers like Amazon, Snapdeal, and Croma.
- Implemented AI-based price prediction, price drop alerts, and detection of hidden costs through web scraping.
- Built an interactive analytics dashboard to track user savings, trends, and historical pricing.
- Deployed via Vercel with CI/CD; used cron jobs for automated price checks and real-time updates.

Suwida Tour and Travels Website | React.js, Next.js, Tailwind CSS, PostgreSQL | [Live Dashboard](#)

- Developed as part of a freelancing project for a client in the travel sector.
- Built a full-featured tour booking platform with Razorpay integration for secure online payments.
- Created an admin dashboard for real-time pricing, package management, and media updates.

CERTIFICATIONS /EXTRACURRICULAR

- **AndinoHack 2025 Hackathon – Participant:** Contributed to Price-Wise, an AI-powered e-commerce price tracker built during the event.
- **BitByte 2024 – Co-Organizer (IUST):** Assisted in planning, coordinating, and executing an inter-college tech event at Islamic University of Science & Technology, open to all colleges and universities, featuring coding competitions, website development contests, and robotics challenges.
- Complete Web Development Bootcamp – Udemy

EDUCATION

Islamic University of Science & Technology, Kashmir

Bachelor of Computer science & Engineering

Aug 2021-Aug 2025

CGPA: 7.5
