Summary

Full Stack Developer with production experience building and deploying Django web applications serving real users. Proven track record delivering a live e-commerce platform (Razorpay payments), event management system, and online examination platform. Strong in backend architecture, PostgreSQL optimization, RESTful API design, and cloud deployment on Render. HackerRank global ranking in MySQL; certified in Java, C, and C++.

Technical Skills

Languages: Python, Java, JavaScript, HTML5, CSS3, SQL, C, C++
Frameworks & Database: Django, Bootstrap, Django ORM, PostgreSQL, MySQL, SQLite
Cloud & Tools: Render, Cloudinary, Neon PostgreSQL, Git, GitHub, VS Code
Core Competencies: Full-Stack Development, RESTful APIs, Payment Integration, Auth Systems, CI/CD, Admin Dashboards

Professional Experience

Full Stack Developer (Freelance)

Dec 2025 – Feb 2026

Veloura Lifestyle

Kanpur, Uttar Pradesh

- Architected and deployed production e-commerce platform from scratch; serving real customers with live transactions and **zero downtime** since launch.
- Engineered Django backend with optimized PostgreSQL schemas for product catalog, inventory, and order processing; integrated **Razorpay** payment gateway with secure webhook handling and automated email workflows.
- Built end-to-end shopping workflows (cart, multi-step checkout, order tracking); reduced page load times by **40%** via caching and lazy loading. Deployed with CI/CD, Cloudinary CDN, HTTPS, and CSRF hardening.

Technical Projects

CampusConnect – College Event Registration Platform

Django, PostgreSQL, Bootstrap

- Built production event management system with secure auth, multi-step approval workflows, and real-time participant management deployed on Render with Neon PostgreSQL and Cloudinary.
- Developed admin dashboard with role-based access control, registration analytics, and automated email notifications for event approvals.

TestZen – Online Examination System

Django, SQLite, HTML/CSS

- Developed full-stack exam platform with subject-wise tests, automated evaluation, and detailed question-level feedback; deployed on Render for real-time access.
- Designed normalized relational DB models for questions, sessions, and scores; implemented secure session handling to prevent result tampering across concurrent users.

Library Management System

Django, SQLite, JavaScript

- Created book library platform with issuing/returning workflows, search, borrowing history, and admin controls for inventory and real-time availability status.

Education

Bachelor of Computer Application (BCA)

Aug 2023 – Jun 2026

Kanpur Institute of Technology

CGPA: 8.63 / 10.0

- Independently built and deployed **4+ live production Django applications** handling real users and payment transactions alongside full-time studies.

Achievements & Certifications

- HackerRank:** MySQL (5 Gold Badges – Global Rank), Java (4 Silver Badges), C & C++ certifications.
- Core Java & Advanced Java Certifications; Django Training** by RCPL Team covering framework best practices and deployment.
- Skill-up Training** – Empowering the Next Generation program by Centum Foundation & Infosys (professional and industry-readiness skills).
