Professional Summary

Frontend Engineer with 6+ years of experience specializing in **React.js** and modern web technologies, building scalable and high-performance web applications. Proven track record of improving application performance by up to **30%** and delivering responsive, user-centric interfaces using **Material UI and Chakra UI**. Strong expertise in component-driven architecture, performance optimization, and seamless user experience across complex applications.

Skills

Frontend: React.js, Typescript, Node, NextJs, Jest, CI/CD, Agile Scrum, Redux Integration

UI Libraries: Material UI, Chakra UI, Tailwind CSS, Bootstrap

Concepts: Responsive Design, Performance Optimization, Reusable Components

Tools: Git, REST API Integration, Agile, Zustand, Cursor Ai, Copilot, AWS, Vercel, Netlify, Azure, Azure dev, Aws

Professional Experience

Maxcode IT Solution Pvt Ltd — Software Developer

Jan 2023 – Present

- Developed and maintained **scalable React.js applications**, improving overall performance by **25–30%** through code optimization and lazy loading
- Built **20+ reusable UI components**, reducing development time by **20%** and ensuring design consistency
- Integrated **AI-driven features** in collaboration with backend teams, enhancing user experience and interactivity
- Designed responsive and accessible interfaces using **Material UI & Chakra UI**
- Optimized cross-browser compatibility and reduced UI bugs, improving application stability
- Actively participated in Agile processes including sprint planning, code reviews, and feature delivery

Winlancer Technologies — Frontend Developer

Sep 2020 – Jan 2023

- Developed dynamic, mobile-first web applications using modern frontend technologies
- Improved page load speed by **20%**, enhancing user engagement and SEO performance
- Created and maintained **reusable component libraries** for faster development cycles
- Collaborated on UI/UX improvements and design systems for scalable applications
- Delivered responsive dashboards and admin panels with a focus on clean UI and usability

Gems Essence Pvt Ltd — WordPress Developer

Jan 2020 – Sep 2020

- Built and maintained responsive websites, ensuring cross-device compatibility
- Resolved UI bugs and improved frontend stability, reducing user-reported issues
- Enhanced website performance through optimization techniques and efficient coding practices.

Education

Bachelor of Engineering (Electronics & Communication)

Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV), Bhopal

2015 – 2019 | **75%**

Additional Information

Languages: English, Hindi, Marathi

Key Projects

AI Pajti – Multi-Modal AI Platform

- Developed a **multi-modal AI interface** for image, music, video, and speech generation using React.js
- Built dynamic and responsive UI using **Chakra UI**, improving user interaction and usability
- Integrated third-party AI tools like **OpenAI & Suno AI** for content generation workflows
- Optimized frontend performance and reduced load time using efficient state management and lazy loading
- Collaborated with backend team (Python, MongoDB) to deliver scalable AI-driven features

Tech: React.js, JavaScript, Chakra UI, MongoDB, AWS, OpenAI APIs

Bubble News – AI-Based News Platform

- Built a personalized **AI-powered news feed system** based on user preferences and interests
- Developed responsive dashboards enabling journalists to **create, edit, and manage content**
- Integrated AI APIs to enhance content generation while maintaining editorial relevance
- Improved UI performance and responsiveness across devices using modern frontend practices

Tech: React.js, JavaScript, Chakra UI, MongoDB, OpenAI APIs

Holochrone AI – Avatar Generation Platform

- Developed interactive UI for **customizable AI avatars** with real-time rendering
- Implemented reusable React components and optimized state management using hooks
- Ensured cross-device compatibility with fully responsive design
- Collaborated with AI/backend teams to integrate avatar generation features seamlessly

Tech: React.js, JavaScript, Argon UI, MongoDB, OpenAI APIs

CarrotCake.io – Role-Based Admin Dashboard

- Built a **role-based admin panel** supporting Admin, Manager, Team Member, and Client roles
- Implemented dynamic UI rendering based on user roles and subscription plans
- Developed modules like **Inbox, Billing, Task Management, Chat, Files, and Analytics Dashboard**
- Improved user workflow efficiency through structured UI and optimized component architecture

Tech: React.js, JavaScript, Node.js, MongoDB, Argon UI
