Summary

Software Engineer with 4+ years of experience developing scalable, high-performance web applications. Proficient in React.js, Next.js, Angular, and TypeScript, specializing in component architecture, state management, and UI optimization. Delivered solutions across AI platforms, service marketplaces, compliance systems, and desktop applications. Skilled in REST API integration and Agile methodologies to build maintainable, user-centric applications.

Skills

React.js, Next.js, Angular, Vue.js, TypeScript, JavaScript (ES6+), Electron.js, Redux, React Query, Context API, Tailwind CSS, Material UI (MUI), Quasar, PrimeNG, ApexCharts, Chart.js, Node.js, REST APIs, WebSockets, PostgreSQL, MongoDB, Axios, Stripe, PayPal, Git, GitHub, Jira, Postman, CI/CD Basics, Google Maps API, html2canvas, jsPDF, OpenAI API, OpenAlex API, NestJS, Python, FastAPI, Socket.io, SendGrid, Postmark

Experience

Web Developer - Shanti Infosoft LLP

Jul 2023 - Present

- Developed scalable, production-ready applications using React.js, Next.js, and Vue.js.
- Implemented modular, component-driven architectures for robust frontend solutions.
- Optimized frontend performance using lazy loading, code splitting, and efficient rendering.
- Reduced page load times through strategic performance enhancements.
- Collaborated with backend teams to design and integrate RESTful APIs.
- Engaged in Agile sprints, ensuring seamless API integration.
- Contributed to full-stack features: authentication, subscription management, and real-time dashboards.

Jr. Software Engineer - Witmates

Jan 2022 – Jun 2023

- Developed and enhanced enterprise-scale OnTrack modules (Dot Map, Transportation, Camping) using Angular and TypeScript.
- Implemented features for staff/vendor tracking, scheduling, GPS fleet management, route planning, reservations, and reporting.
- Integrated Google Maps APIs and real-time operational workflows to support large-scale event coordination.
- Collaborated with cross-functional teams to deliver scalable, maintainable, and user-focused solutions.

Projects

EdUnited (RoznaBreez) — AI-Powered Educational Platform | Next.js 14 (frontend), NestJS (backend), MongoDB, Python/FastAPI

- Architected a three-layer SaaS platform using Next.js 14, NestJS, and MongoDB, integrating a Python/FastAPI AI microservice for GPT-4 content.

- Developed a 4-step AI book creation wizard, generating structured textbooks with units, chapters, assessments, and cover imagery.
- Implemented RBAC (4 roles), JWT authentication, an interactive textbook reader, and course/group management features.
- Integrated OpenAlex research paper search and AI-suggest features for academic reference linking.

VPN Application | Next.js, Node.js, PostgreSQL, Stripe, PayPal, WireGuard, SendGrid, POSTMARK

- Designed and developed a full-stack VPN platform with subscription lifecycle management, user dashboards, and transaction history.
- Built a gift-based subscription system, enabling plan sharing and redemption between users.
- Integrated Stripe and PayPal payment gateways for secure, multi-channel payment processing.
- Architected an extensible email delivery system, supporting seamless migration between SendGrid and Postmark.
- Implemented WireGuard-based VPN connectivity for high-performance, low-latency networking.
- Developed backend services for authentication, subscription management, and push notifications.

Synapse - AI-Powered Enterprise Platform | Next.js, TypeScript, OpenAI API, REST APIs, PostgreSQL

- Developed an AI-driven enterprise SaaS platform featuring intelligent chat, document generation, and text summarization.
- Implemented RBAC, employee management, and configurable enterprise modules.
- Built a token-based wallet system for AI usage tracking and cost attribution.
- Designed scalable architecture using Next.js App Router with a modular component structure.

ComplyEd - Education Compliance Management | Quasar, Vue.js, Chart.js, ApexCharts, REST APIs

- Developed and maintained the frontend for an education compliance platform, tracking audits and inspections.
- Built responsive dashboards with interactive analytics using Quasar, Chart.js, and ApexCharts.
- Collaborated with backend teams to integrate REST APIs, enhancing UI consistency and performance.

Helpz - Credit-Based Service Marketplace | React.js, JavaScript, Tailwind CSS, Redux, Axios, REST APIs

- Developed and optimized the frontend for a credit-based service marketplace across multiple verticals.
- Implemented credit-based transaction logic, ensuring accurate balance management and seamless checkout.
- Built responsive, accessible UIs using modular React components with secure REST API integrations.

Extratime - ExtraStreamer - Angular-Electron Desktop App | Angular, Electron, TypeScript, Node.js, NDI, Chromecast, REST APIs

- Developed and optimized a desktop ad streaming application for dynamic video playback and multi-bundle management.
- Implemented ad decryption, NDI generation, and API-driven ad targeting for broadcast delivery.
- Enhanced performance by resolving multi-launch issues, improving Chromecast handling, and enabling hot reloading.

OnTrack - Event Operations Management System | Angular, TypeScript, Tailwind CSS, PrimeNG, Google Maps API, html2canvas, jsPDF, REST APIs

- Developed and enhanced OnTrack systems (Dot Map, Transportation, Camping) for large-scale event operations.
- Implemented staff/vendor tracking, scheduling, GPS fleet management, route planning, and reporting.
- Improved operational efficiency and coordination through scalable system enhancements and real-time data flows.

Education

B. Tech - Information Technology - SGSITS Indore

2019-2022

Diploma - Computer Science & Engineering - Govt. Polytechnic College

2016-2019
