

Jaya Darwade Software Developer

jayadarwade524@gmail.com | (+91) 9329736361 | www.linkedin.com/in/jaya-darwade-943b61242

Professional Summary:

Results-driven Backend Engineer with 3.7 years delivering scalable Node.js/TypeScript RESTful APIs across IoT, fintech, social, and SaaS domains. Proven track record integrating third-party services (Stripe, Twilio, Firebase, Razorpay), architecting real-time systems with MQTT and deploying production workloads on AWS EC2/S3.

Technical Skills:

Languages: JavaScript, TypeScript, SQL

Architecture: REST APIs

Messaging / RT: MQTT, Socket.IO

Payments: Stripe, Razorpay,

ORM / ODM: Sequelize, Mongoose

VSC: Git, Github

API Documentation: Postman, Swagger

Frameworks: Node.js, Express.js, EJS

Databases: PostgreSQL, MongoDB, MySQL

Cloud & DevOps: AWS EC2, AWS S3, AWS IoT Core, Nginx, PM2

Integrations: Twilio, Firebase FCM, SendGrid,

Auth & Security: JWT, QR Code Authentication

AI Tools: Cursor, Antigravity, Copilot, ChatGPT, Claude

Development tools: Jira, VS Code, PGAdmin, MongoDB Compass

Experience:

Software Developer | ByteCipher Pvt Ltd Indore

(25 July 2022 – 31 Jan 2026)

Projects:

Swap Stop — IoT Smart Locker Platform (admin.theswapstop.com)

- Architected 10+ RESTful APIs in Node.js/TypeScript/PostgreSQL covering auth, offer lifecycle, and real-time locker booking.
- Implemented MQTT IoT communication for QR-enabled smart locker access, enabling zero-contact item swapping across all active locker units.
- Integrated Stripe with automated Twilio/SendGrid/Firebase notification pipelines, achieving end-to-end transaction automation with notification.
- Deployed full production stack on AWS EC2 with Nginx reverse proxy, SSL, and

Super Parent — Summer Camp Logistics App

- Built automated driver-and-child trip assignment RESTful APIs using Node.js/TypeScript/PostgreSQL + Twilio, reducing manual scheduling camp coordinators.

Folio4U — Company Portfolio Management Platform

- Designed RESTful APIs for company registration, project management, and sharable client-facing portfolio links with Razorpay billing, supporting multi-tenant architecture.

FlirtiGo — Location-based Dating App

- Led backend development using Node.js, Express, and MongoDB, implementing features such as user profile management, interests, follow/unfollow, blocking, and date requests. Collaborated with the frontend team, tested APIs using Postman, and ensured smooth integration of chat and date management functionalities.

Blips — Social Video Platform (Instagram + Snapchat Hybrid)

- Developed location-based video filtering REST APIs using Google Maps + MongoDB + AWS S3, enabling geo-targeted content discovery for a growing user base.
- Scaled engagement features (follow/unfollow, comments, likes, friend requests) with optimized MongoDB aggregation pipelines, supporting high-concurrency social feeds.

M-Society | M-Square | Advertisement — SaaS Management Platforms

- Integrated Razorpay subscription & payment flows for M-Society's society management system and M-Square's vendor loyalty card platform (prepaid, postpaid, rewards).
- Implemented NPS scoring, ad campaign management, and polling REST APIs for the Advertisement platform, enabling data-driven campaign analytics for business clients.
- Optimized secure file handling with Multer for image/document uploads, and built visitor management + push notification systems serving multi-building residential societies.

Academics:

One-year Software Development Training	InfoBeans Foundation, Indore	2021 - 22
Graduation	Devi Ahilya Vishwavidyalaya Indore	2018 - 21
HSC	Madhya Pradesh State Board	2018
SSC	Madhya Pradesh State Board	2016
Language Efficiency	Hindi, English
